#1 Reusable Bolt Template in Pole Base Construction

BOLT STAR® is a reusable bolt template designed to hold four anchor bolts and conduits in place while supporting the rebar cage during the toughest concrete pours.

FEATURES

Lightweight High Strength ABS
Rugged, washable, reusable

Center Hole
4 1/8" opening holds conduits in place during concrete pour

Bolt Projection Calculator
Calculate proper bolt projection from top of form

Integrated Bubble Leveling System
Ensures straight bolts and level bases

Adjustable Bolt Slots
Get it right with pre-measured markings for 7" to 14" bolt circle patterns

Arched Arms
For complete finishing of base top without removing Tool

Cage Tie Slots
Center and hold rebar cage during concrete pour

Specifications
Holds 4 anchor bolts, 5/8" to 1" in diameter and up to 36" long.

Sizes: 18", 24" and 30"

INDUSTRY AWARD WINNER

18"

24"

30"

BENEFITS TO CONTRACTORS

SAVES LABOR

Cuts set up time in half for every pole base. Contractors report huge savings in the time it takes to set up and pour a base compared to the old method of building wood templates. Bolt Star's wide arms promote faster pours with ample room for a vibrator.

REUSABLE

Eliminates wood templates building, and the tool typically pays for itself on the first job. Need to pour 24 bases in three days? Buy 8 Bolt Stars and reuse them three times, then save them for the next job! A durable tool, strength tested to 1,000-lbs.

REDUCES RISK

Creates a standardized process that is 57% more efficient for achieving quality and accuracy with no measuring, cutting, and drilling of holes. Room to trowel finish the top of base without removing the template, lowering risk of leaners and costly rework.

THE DARK AGES OF BUILDING WOOD
TEMPLATES ARE OVER.

AVAILABLE
**18" 24"
OR 30"**

WITH BOLT STAR: 6 STEPS

<p>1</p>	<p>2</p>
<p>Set Bolt Star on form</p>	<p>Install bolts</p>
<p>3</p>	<p>4</p>
<p>Attach cage to Bolt Star</p>	<p>Pour concrete – room for chute and vibrator</p>
<p>5</p>	<p>6</p>
<p>Finish top of base</p>	<p>Remove Bolt Star</p>

<p>now</p>	<p>THEN</p>
-------------------	--------------------

BOLT STAR*

- One template serves all
- Installs on tube & centers bolts
- Saves labor, 57% more efficient
- Room to finish top of base
- Wide arm openings, faster pour
- Consistent quality, reduced risk of errors

WOOD TEMPLATES

- Multiple templates for bolt circles
- Requires 2x4 supporting material
- Labor spent never ends, wasted
- No room to finish, wood gets in way
- Small openings, slower pour
- Increased risk of errors, costly rework

★ **ADVANTAGE: BOLT STAR**

WITHOUT: 14 STEPS

<p>1. Cut template supports</p>	<p>2. Cut out template</p>	<p>3. Layout bolt pattern</p>	<p>4. Drill holes</p>	<p>5. Secure bolts to template</p>
<p>6. Place template on form</p>	<p>7. Center and check level</p>	<p>8. Fasten template to supports</p>	<p>9. Secure supports to H frame</p>	<p>10. Secure cage to supports</p>
<p>11. Pour concrete</p>	<p>12. Rough finish top of base</p>	<p>13. Remove template</p>	<p>14. Final finish</p>	<p>Don't pull too early!</p>
