

Adjustable Joist Hanger

Meadow Burke

The Meadow Burke JH-53

This outstanding bridge deck forming system is efficient and applicable to precast or steel beam use. The MB JH-53 will reduce material, labor and equipment costs as compared to traditional forming methods.

Features and Benefits of the JH-53 include:

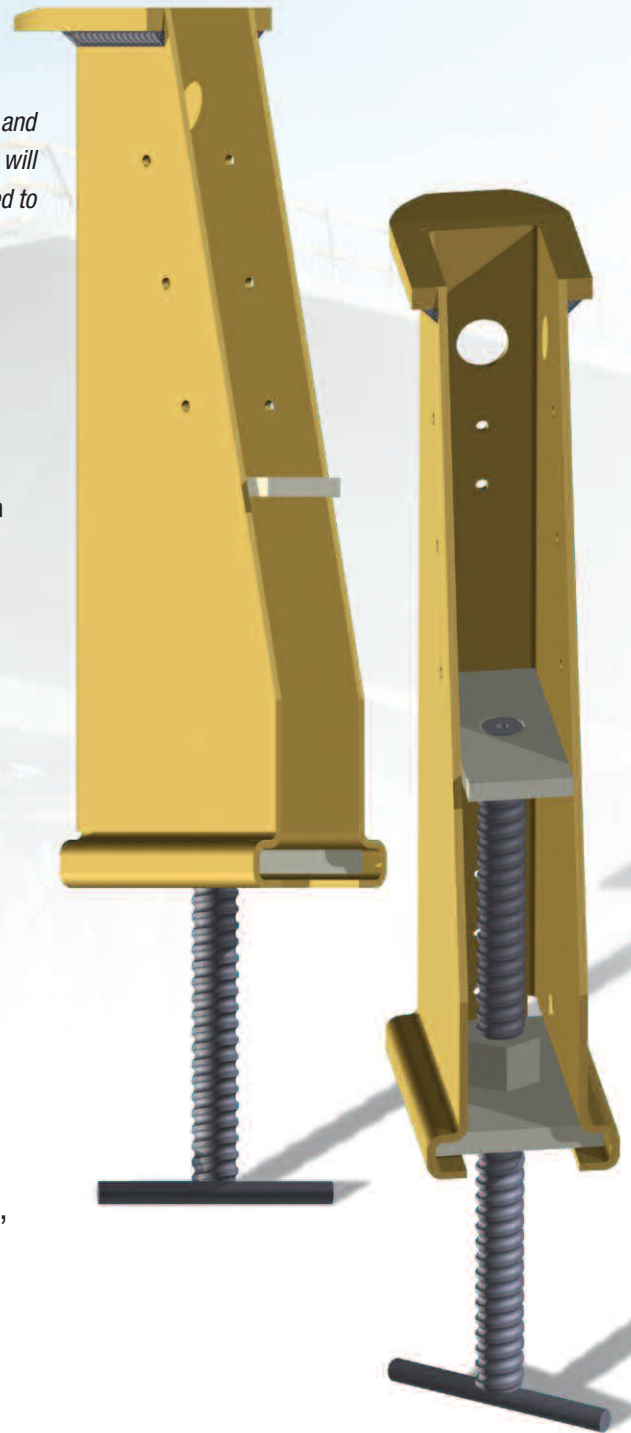

- Significantly reduces undershoring materials.
- Set up and stripping times are substantially reduced.
- The adjustable screw and elevator plate system provides ease of installation and removal.
- 10 Gauge steel body with zinc plating provides multiple reuses.
- The unit can be used with 2x6, 2x8, 2x10 and 2x12 joists.
- Adjusts up to 9-1/2".
- 3500 lbs. capacity. Provides 2:1 safety factor.

A wide variety of forming uses in addition to elevated slabs:

- Tunnels
- Parking Ramps
- Box Culverts
- Reshoring Projects
- Bridge Decking
