

D25/26 Fitting Up Bolt & Nut

DESCRIPTION

Dayton Superior Special Fitting Up bolts and nuts are used for securing steel form panels together—available in 3/4" diameter x 2" long.

FEATURES & BENEFITS

- The tapered nose of the bolt acts as a draft pin and helps align the forms.
- The thread design and clearances between the nut and bolt permits quick assembly and dismantling of the forms.
- Open thread design permits concrete to be easily knocked out of the threads.
- Used for securing steel form panels together—available in 3/4" diameter x 2" long
