

The JackJaw® Advantage

JackJaw® stake extractors pull stakes straight up out of the ground without bending them or breaking the fresh concrete, even when the stake is flush with the top of the form. A 50lb push on the handle generates a massive 1050 lbs of gripping force and a 450lb upward breakout force on the stake. This tremendous leverage prevents operator back injuries. JackJaw® provides powerful, precise stake pulling.

Handle Force (lbs)	Gripping Force (lbs)	Breakout Force (lbs)
50	1050	450
100	2100	900
200	4200	1800

Made to Last

JackJaw® stake extractors are produced in Dayton, Ohio from heavy gauge steel plate and tubing to withstand everyday job site use. The easily replaceable jaws are case hardened AR400 steel for long wear. No paint to chip. JackJaw® units have a zinc and clear chromate plating for long lasting durability and corrosion resistance.

Where to Buy

Call or email us to find the closest dealer to you. Service parts and accessory items may also be purchased directly through the web at www.jackjaw.com. Satisfaction guaranteed!

Dealer inquiries are welcome. Interested dealers can contact Bob Anderson at **937-609-8937** or e-mail bob@jackjaw.com.
