

Euro She-Bolts

15mm and 20mm threaded ties for quicker gangform assembly and stripping

Euro She-Bolts are heavy duty, reusable form ties used for medium and heavy concrete forming applications. Euro She-Bolts are used in combination with Inner Tie Rods or Euro Rod cut to length on the job site.

The expendable Inner Tie Rod joins two Euro She-Bolts to create the form tie assembly. A Flat Washer and Wing Nut (following page) placed on the threaded end transfers the load to the forming system frame or waler.

Applying waterproof grease evenly to Euro She-Bolts prior to concrete placement facilitates removal. The squared end can be turned with a wrench during removal. Worn or damaged Euro She-Bolts and hardware must be replaced.

Reusable Euro She-Bolts and Inner Tie Rods can be used with different types of forming systems.

Euro She-Bolts				
Part No.	Description	Inner Rod Size	Safe Working Load *	Weight/lbs
SBESB1615MM	15mm She-Bolt 16"	15 mm	22,400 lbs	2.0
SBESB1815MM	15mm She-Bolt 18"	15 mm	22,400 lbs	2.6
SBESB2415MM	15mm She-Bolt 24"	15 mm	22,400 lbs	3.0
SBESB1820MM	20mm She-Bolt 18"	20 mm	39,200 lbs	3.3
SBESB2420MM	20mm She-Bolt 24"	20 mm	39,200 lbs	4.0
SBESB3020MM	20mm She-Bolt 30"	20 mm	39,200 lbs	10.5

* Safe working load based on safety factor of 2:1.
